

List of Industry Polluting Ganga - Compliance of NGT order dated 29-10-2014 in Original Application No 196 of 2014: Krishan Kant Singh & Anr Vs. National Ganga River Basin Authority & Ors

1. The operating part of order dated 29.10.2014 of Hon'ble National Green Tribunal, Principal Bench, New Delhi related to Jharkhand State Pollution Control Board, Ranchi passed in Original Application No 196 of 2014: Krishan Kant Singh & Anr Vs. National Ganga River Basin Authority & Ors reads as follows:

“The Learned Counsel appearing for the State Governments and the State's Board, undertake that State of West Bengal, State of Uttarakhand, State of Jharkhand, State of Bihar, State of Uttar Pradesh, State of Madhya Pradesh shall also place on their respective websites the names of industries which are discharging their effluents into the River Ganga or its tributaries and particularly with regard to 'seriously polluting industries' which have not installed or have installed anti polluting devise/ ETPs which are not operating satisfactorily at the first instance.”

2. River Ganga catches a stretch of 36 km of Jharkhand i e from Sahebganj to Rajmahal. From the point of view of pollution control, River Damodar is the main tributary and River North Koel is the main sub-tributary of River Ganga from Jharkhand. It is pertinent to mention that the Rivers of Nalkari, Bhairavi, Bokaro, Konar, Garga, Jamunia, Katri, Khudia and Barakar are main tributaries of River Damodar in the State. Damodar rises in Jharkhand and covers a distance of around 300 kms in the State and then around a distance of 281 kms in West Bengal before it joins River Ganga (Hooghly) in West Bengal at Shyampur, Kolkata. River North Koel runs along the western boundary of the State. It joins River Sone, which joins River Ganga in upstream of Patna.
3. The Central Pollution Control Board has informed that the industry that lies within 17-category of industries and or that discharges of effluent having 100 kg per day or more of BOD or toxic may be termed as “Seriously Polluting Industry”.
4. The sewage of the township of Sahebganj and the effluents of the following mines and industries find ways to river Ganga:
